

Happy Holidays from **#1 PROPERTIES**

Cut out the square. Fold diagonally in half into a triangle to crease. Unfold and repeat with the other side, creasing and unfolding back to the square. Cut out the top triangle wedge along the crease lines. Leaving a long rectangle in the middle of the bottom triangle wedge, cut out the bottom wedge. You should have something looking like a bowtie with a tail. Fold the corners of the bowtie into the middle and tape. Repeat with the other side. Finally, wrap the tail around the center of the bowtie and voila! You have a Christmas bow! Share a photo of your creation to Facebook/Instagram and tag #1 Properties!
